Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 July 2007.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

This action is in response to arguments filed 7/2/2007. Currently, claims 1-12 are pending in the instant application, wherein claims 10-12 have been withdrawn from consideration.

Response to Arguments

Applicant's arguments, see pages 4-6, filed 7/2/2007, with respect to the rejection(s) of claim(s) 1-4 under 102(e) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Johns (US Patent 4,513,739).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Johns (US Patent 4,513,739). Johns discloses a wound-dressing product (100) comprising a wound dressing element (102) having an adhesive surface (104), a cover arrangement (106, 108, 610) having at least two cover elements (106), wherein the two cover elements (4) are separated by a partition line (112) and each cover element (106) has a removal aid (108) connected to the cover element (106) and where the two

Art Unit: 3772

removal aids (108) overlap (fig. 2) the two cover elements (106). Adhesive strips (col. 3, lines 41-45) extend parallel to the partition line (112) under the removal strips, fastening the removal strips to the cover elements (106). The removal strips (fig. 2) are separated by the partition line (112). The removal aid (108) and cover elements (106) may be made of the same material or made integrally, therefore, it can inherently be made of different materials. The haptic properties of different materials would allow the user to distinguish the removal aid (108) from the cover element (106). The cover arrangement (106, 108, 610) encloses the wound dressing element (102) and comprises two reinforcement elements (610) on the lateral edges of the wound dressing element (102).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Johns (US Patent 4,513,739). Johns substantially discloses the claimed invention; see rejections to claims 1 and 5 above. Johns fails to disclose the removal aid is distinguishable by color from the cover element. However, at the time of the invention it would have been an obvious matter of design choice to a person of ordinary skill in the art to make the removal aid and cover elements of different colors because Applicant has not disclosed that the different colors provide an advantage, is used for a particular purpose, or solves a stated problem. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the color of the removal aid and cover elements of Johns to obtain the claimed invention because such a modification would have been considered a mere design consideration which fails to patentably distinguish over the prior art of Johns.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brandon Jackson whose telephone number is (571)272-3414. The examiner can normally be reached on Monday - Friday 8-5:30.
